9 May 2026

A Free Bible Study Application for PC Users with Visual Impairments

Download Link: [https://newvisionconcepts.com/files/ezbible\\_setup.exe](https://newvisionconcepts.com/files/ezbible_setup.exe)

**EZBible is free of charge.** When opened for the first time, it presents a white screen in which you should enter the **password, which is “bible918”**.

**EZBible** is one of over 100 applications available in the [EZReader](#) suite of applications, all of which are designed for users with visual impairments. **EZBible** and all other **EZReader** applications address the needs of low vision users by providing software with the following key design criteria:

- Minimal Computer Skills
- Clean, Simple Screen Designs
- Unlimited Text Size
- High Contrast Colors
- Easy-to-Use Touch Screen Navigation
- Text-to-Speech and Voice Dictation

**EZBible and EZReader** are offered by [New Vision Concepts](#).

## Table of Contents:

<a href="#">Introduction</a>	- Highlights, Videos, User Comments, Credits
<a href="#">Main Screen</a>	- Book, Chapters, Verses, Bibles, Commands
<a href="#">Searching</a>	- Search Terms, BookMarks, Concordance
<a href="#">User Notes</a>	- Note Taking
<a href="#">Tutorials</a>	- Summary, Top Verses, Study Plan
<a href="#">Settings</a>	- Bible Selection, Verse Title Formats
<a href="#">Verse Comparison</a>	- Compare Verse From Each Bible
<a href="#">Shortcuts</a>	- Keyboard shortcuts (One Page List)
<a href="#">Speech</a>	- Speech Options
<a href="#">Shortcuts</a>	- Keyboard Shortcuts (Full Descriptions)
<a href="#">Resources</a>	- Other Bible Study Resources
<a href="#">Change History</a>	- Recent Changes

## Introduction:

From the main screen of **EZBible**, the current Bible will scroll to the Book/Chapter/Verse as selected by the user. At any time, the user can have **EZBible** read the Bible out loud, starting at the caret location. The toolbar provides a Width button which toggles display of the Book/Chapter/Verse columns, allowing the Bible to be displayed using the entire screen.

**EZBible** allows the user to select from 7 different Bibles and can display a verse from all 7 Bibles at once, allowing the user to compare their differences. Bible selection is made in Settings.

From the main screen, the user can also access additional major features – Searching, Note Taking, and Tutorials which are described in this Help manual.

The screenshot shows the EZBible main screen. At the top is a toolbar with icons for Home, Width, Play, Search, Notes, Tutorials, Settings, COMP, and a menu icon. Below the toolbar is a table with columns for Books, C50, V31, and a large text area. The text area displays the first two verses of Genesis in yellow text on a blue background.

Books	C50	V31	
Genesis	1	1	<b>Gen1:1 In the beginning God created the heaven and the earth.</b>  <b>Gen1:2 And the earth was</b>
Exodus	2	2	
Leviticus	3	3	
Numbers	4	4	
Deuteronom	5	5	
Joshua	6	6	
	7	7	

## **EZBible Highlights:**

- Designed for low vision and legally blind users (large fonts, selectable high contrast colors, minimum visual complexity, verbal feedback)
- Display any of up to 7 Bibles: KJV, NKJV, NET, NLV, NIV, ERV, NSRV.
- Easy, quick navigation between verses
- Full screen and compact viewing layouts
- Multiple verse viewing formats
- Reads Bible verses out loud (including word underlining and line scrolling)
- Search the Bible for words and phrases (up or down)
- List of all verses containing a search term
- User Notes – user can enter Notes for subsequent viewing
- Bookmarks – create an easy access list of favorite verses
- Concordance – list all words in the Bible and the verses containing each word
- Copy selected text for pasting in other documents, email, etc.
- Print selected text or verses in large or small fonts
- Control volume, speaking speed and male/female voice gender
- Customized text formatting: all caps, underlining, character/line spacing
- Special Shade formatting – highlighting of lines for horizontal eye tracking
- Keyboard shortcuts for all Toolbar and other supported commands
- Verbal and text popups to indicate user-entered command functions
- Identify current Book/Chapter/Verses on the screen

## **EZBible Training Videos:**

There are 5 training videos available to help users learn to use EZBible.

1. [Introduction](#)
2. [Toolbar Commands and Menu Button](#)
3. [Search Features](#)
4. [Notes Features](#)
5. [Tutorials](#)

## **User Comments:**

**EZBible** is a new addition to the EZReader suite of low vision software. It was one of the most requested applications by the EZReader community and has been widely praised by its users.

**“Macular degeneration robbed my mother of so much. EZBible restored the light of scripture to her life. She’s not just reading God’s word now, she’s found new purpose in life because she’s leading a Bible study for others!”**

**... Rachel, Texas**

**“Gary, you haven’t made my day, you have made my year!”**

**,,,James, Texas**

**“It has everything I need to study the Bible!”**

**,,,Richard, Alabama**

## Credits:

I want to give credit to some incredible folks whose combined efforts encouraged and enabled me to create **EZBible**.

### **Rachel & Margaret:**

When Margaret Bendor-Samuel, a 93-year-old retired Wycliffe Bible Translator missionary developed macular degeneration she was unable to read the Bible - isolating her from its life-long comfort and encouragement. Her daughter, Rachel Staalsen, and I worked together literally hours every day for almost 3 months to come up with **EZBible**. I would come up with a prototype. Then, Rachel would point out difficulties or inaccuracies. We took great care to treat this sacred book with the respect it deserves. It was a painstaking process! Margaret would patiently field test the improvements and give (or sternly withhold) her nod of approval. And usually that happy nod came with suggestions for even more features!

With **EZBible** now in hand, Margaret is delighted to be able to read and study the Bible again. Rachel tells me that Margaret is even leading a Bible study once a week! Margaret and Rachel have expressed their appreciation in having been part of this important project and hope many others will benefit from it.

### **James:**

A retired vet, James, had purchased EZReader to help with his macular degeneration. Early on I happened to mention the Bible app that I had in work and he was ecstatic! It turns out he is a practicing pastor and desperately wanted something to help him study the Bible, take notes and write his sermons. His need for note taking was implemented in **EZBible**. The need for notes was echoed by Margaret, along with further suggested improvements.

### **Richard:**

Having heard about my work on the Bible app, my EZReader customer Richard expressed an interest in being a beta tester. He turned out to be quite the Bible scholar and gave me many suggestions on features to add and on improvements needed in **EZBible**. Through testing, Richard often found performance issues, gave suggested changes and evaluated the updates. We spoke weekly throughout the entire development of **EZBible**.

## Main Screen:

Books	C50	V31	
Genesis	1	1	Gen1:1 In the beginning God created the heaven and the earth.
Exodus	2	2	
Leviticus	3	3	
Numbers	4	4	
Deuteronom	5	5	
Joshua	6	6	Gen1:2 And the earth was
	7	7	

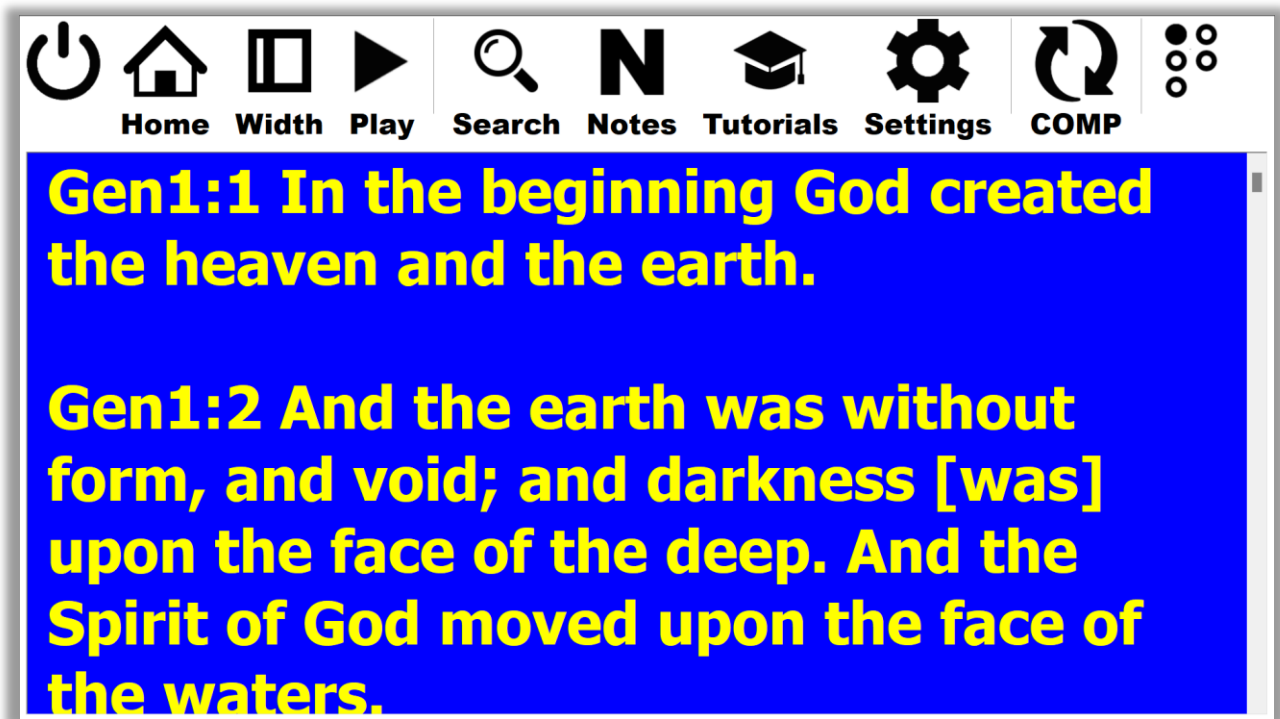

The **EZBible** main screen consists of a toolbar through which users issue commands to **EZBible**. There are 3 columns of information, with the Bible content displayed on the right side of the screen.

The first column displays a list of the books in the Bible. When a book is clicked, the 2<sup>nd</sup> and 3<sup>rd</sup> column headers then show how many chapters and verses there are in that book. When the user clicks a chapter and verse, the Bible in the textbox is scrolled to that location in the Bible.

**Note:** The text field containing the Bible is read-only.

## Main Screen – Wide Layout:

The Book/Chapter/Verse columns can be hidden, to give more room for the Bible text. The Width toolbar button toggles the wide layout.

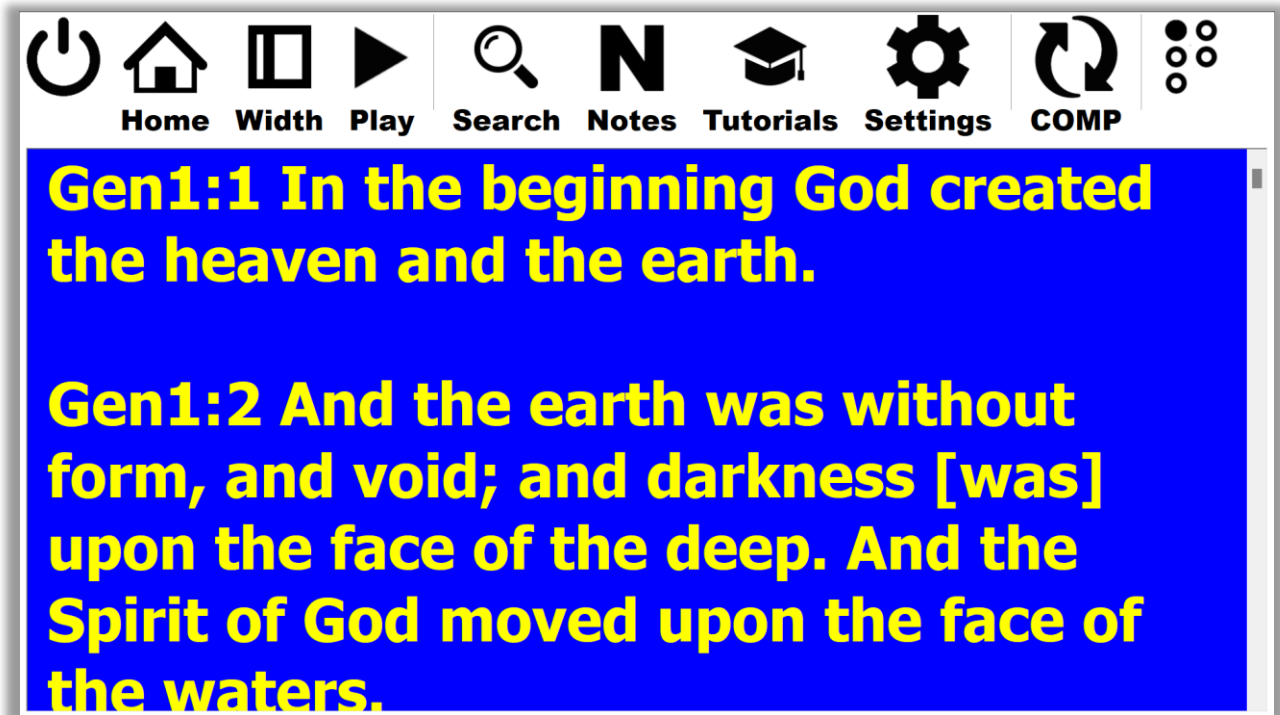

## Verse Title Formats:

There are 3 ways in which Bible verses can be formatted, i.e., how the Book/Chapter/Verse title information is displayed.

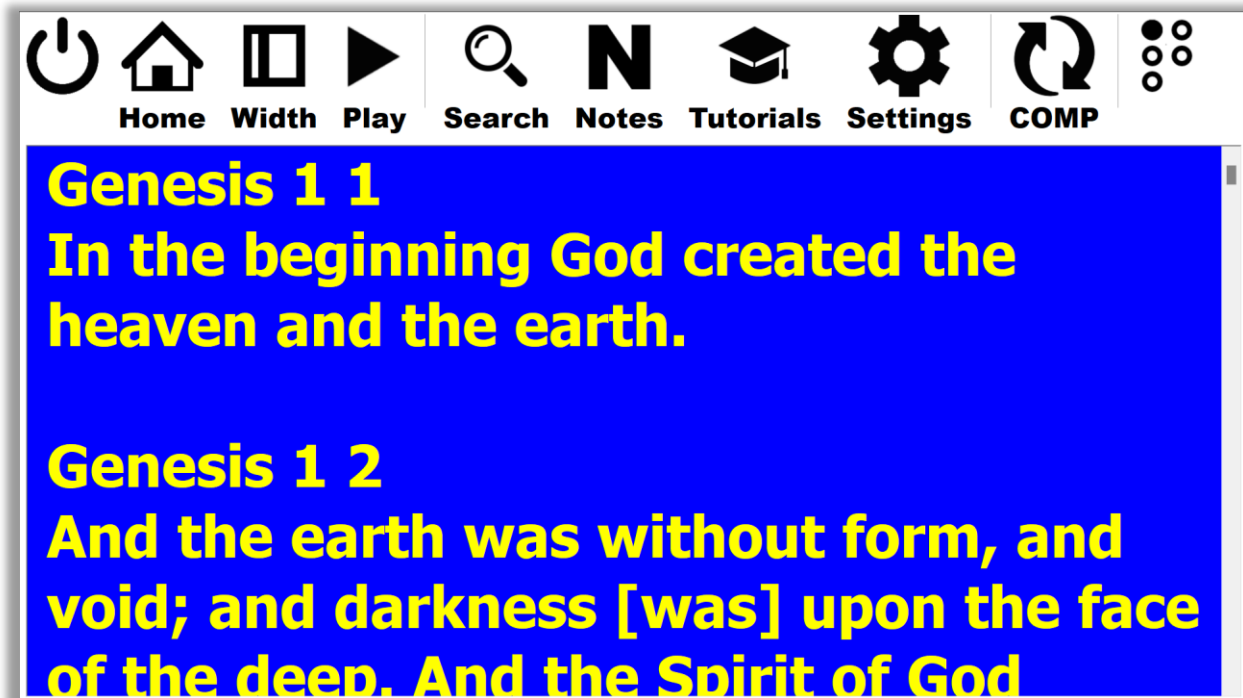

### Format 1: Compact Title

The “Gen1:1” format can be used to display the Book/Chapter/Verse title at the start of each verse. It uses minimal characters to identify the verse and is used in many versions of the Bible.

## Format 2: Full Title

The “Genesis 1 1” format can be used to display the Book/Chapter/Verse before each verse. When spoken, the Full format sounds better than the Compact format but still gives full location information before each verse.

### Format 3: Short Title

The “Genesis 1” format displays the Book/Chapter, where each verse is then led by the verse number. This minimizes what is spoken when Play is pressed, at the expense of not showing full location in front of each verse.

The screenshot shows a mobile application interface with a white navigation bar at the top. The bar contains ten icons: a power button, a home icon, a window icon, a play button, a magnifying glass, a large letter 'N', a graduation cap, a gear, a circular arrow, and a three-dot menu. Below the icons are labels: Home, Width, Play, Search, Notes, Tutorials, Settings, and COMP. The main content area has a blue background with yellow text. The text reads: **Genesis 1**  
**1 In the beginning God created the heaven and the earth.**  
**2 And the earth was without form, and void; and darkness [was] upon the face of the deep. And the Spirit of God moved upon the face of the waters.**  
**3 And God said, Let there be light: and**

## Toolbar Command Rows:

The Toolbar provides icons that a user clicks to take an action. Because of the many features **EZBible** offers, there are 5 rows of command icons. Navigating from row to row is accomplished by pressing on the Menu (“dots”) icon at the right end of the Toolbar.

**EZBible** provides 5 rows of command icons:

Click on the “dots” icon to cycle through the command rows. Toolbar buttons consist of an icon and text, both of which should be self-explanatory of their function. Also, when the mouse is moved over an icon, the function of the command can be spoken out loud or a descriptive popup text can also be shown. Right-mouse clicking on a command icon also provides the same information.

## Command Row 1 – Primary Features Access:

- **Home** – reset toolbar
- **Width** – hides the 3 columns, allowing full width display of the Bible text
- **Play** – toggles reading the Bible out loud, starting at the caret position
- **Search** – opens a new dialog with multiple search features
- **Notes** – opens a new dialog with support for taking notes
- **Tutorials** – opens a new dialog with a variety of training information about the Bible and its contents
- **Settings** – opens a new dialog that allows changing which Bible is displayed and how the verses are presented
- **COMP** – displays the current verse from all Bibles, allowing a user to compare how the verse differs in each Bible

**Note:** Exit, Home, Width and Play buttons are found on all toolbar rows.

## Command Row 2 – Sound Options:

Row 2 provides additional icons, allowing the user to control speaker volume. It also provides control of how fast speech is spoken and whether a Male or Female voice is used. It also provide an icon to bookmark the verse at the caret.

## Command Row 3 – Utility Function:

Row 3 provides speak, copy and print options. If a selection is made in the bible, then the selection is used, otherwise the current verse (the one containing the caret) is used.

The large print icon prints in the currently displayed font size. The small print icon prints in a fixed 16 pt font.

## Command Row 4 – Font Options:

Row 4 allows the user to increase/decrease font size, change the font to Bold and to change the Font name as well. Foreground and text colors can be changed by using the “Color” icon.

## Command Row 5 – Formatting Options:

Row 5 adjusts how Bible and Note text is displayed. Letters can be displayed as all upper-case, which some users find easier to see. The line of text at the cursor can be underlined. Horizontal spaces between letters can be widened. Vertical spaces between lines can be adjusted.

With Shade, the line at the cursor is displayed using the user-specified colors, but all other lines are grayed out. This helps a user’s eyes track a line.

## Searching:

**EZBible** offers three search options, available by clicking on the “Search” button on the main screen.

### **Matches:**

Displays a list of all verses in the Bible that contain the search term. Scrolls to the selected verse in the Bible.

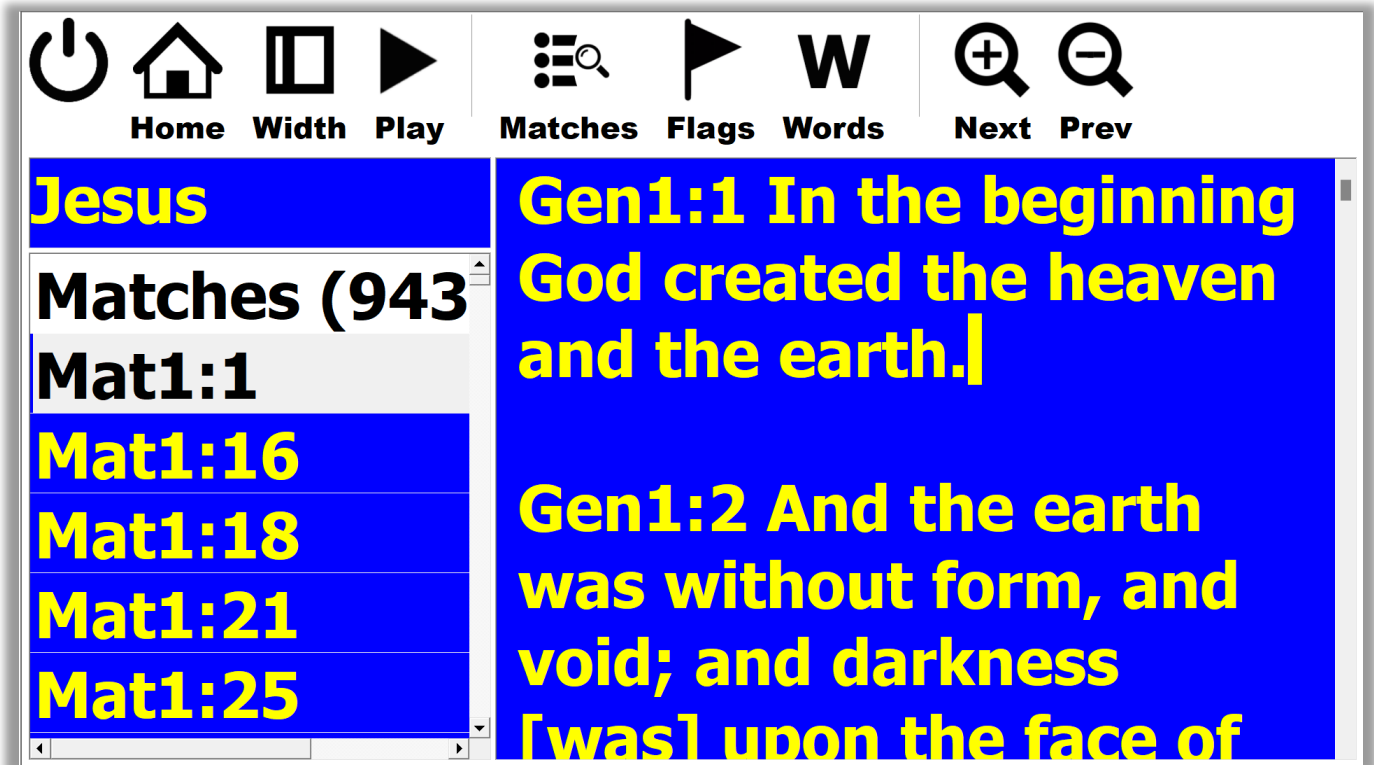

### **Flags:**

Displays a list of verses bookmarked by the user. Scrolls to the selected verse in the Bible.

### **Words:**

Displays a list of all words in the Bible. Displays a list of all verses containing the selected word. Scrolls to the selected verse in the Bible.

## Matches:

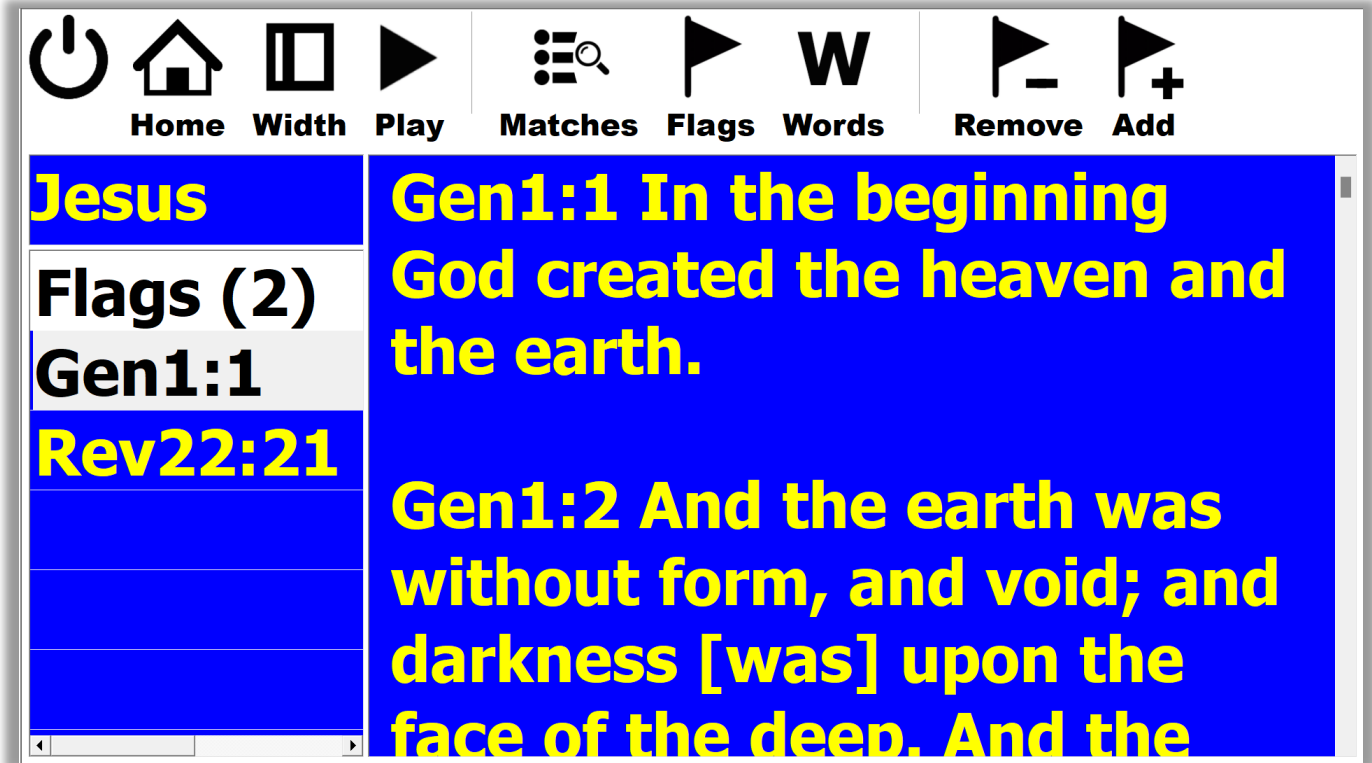

The Search Term is entered into the textbox shown in the upper left of the screen. Pressing ENTER creates a list of all verses the Bible that contain the search term. Selecting a verse scrolls the Bible to that verse. Also, the search term is highlighted and keeps focus so the user can immediately type in another search term.

The toolbar “Matches” puts EZBible in search mode and performs a search for the search term. The current selected text, if any, is placed in the search textbox and becomes the next search term. This allows a user to enter a new search term without having to type it.

The “Prev” and “Next” icons on the Toolbar can be used to search Up or Down the Bible, starting from the cursor location.

## Flags (Bookmarks):

Users can flag (bookmark) individual verses in the Bible and then display that list for convenience in scrolling to those verses.

The Add and Remove icons are used to flag a selected verse or to remove the flag from an already flagged verse. The user can choose whether the commands act on the line that contains the cursor, or the verse whose line is shown at the top of the Bible display. The Flags icon will display a list of all flagged (bookmarked) verses. Clicking on a verse in the list causes the Bible to scroll to that verse.

The most recently flagged verse is at the top of the list.

## Concordance (Word List):

The “W” icon displays a list of all words in the Bible, also called a Concordance. A second list is also shown that contains all verses containing the selected word.

The screenshot shows a software interface with a top navigation bar containing icons for Home, Width, Play, Matches, Flags, and Words. The 'Words' icon is selected. Below the navigation bar, the word 'Jesus' is displayed in a blue header. To the left, a list of words is shown, with 'Jesus' selected. To the right, a list of verses is shown, with 'Exo4:14' selected. On the far right, a large text area displays the verse 'Gen1:1 In the beginning God created the heaven and the earth.' and 'Gen1:2 And the earth was without form, and void; and darkness [was] upon the face of the deep. And the Spirit'.

Words (12,564)	Verses (331)	Text
aaron	Exo4:14	Gen1:1 In the beginning God created the heaven and the earth.
aaronites	Exo4:27	Gen1:2 And the earth was without form, and void; and darkness [was] upon the face of the deep. And the Spirit
abaddon	Exo4:28	
abagtha	Exo4:29	
abana	Exo4:30	
abarim	Exo5:1	
abase	Exo5:4	
abased	Exo5:20	

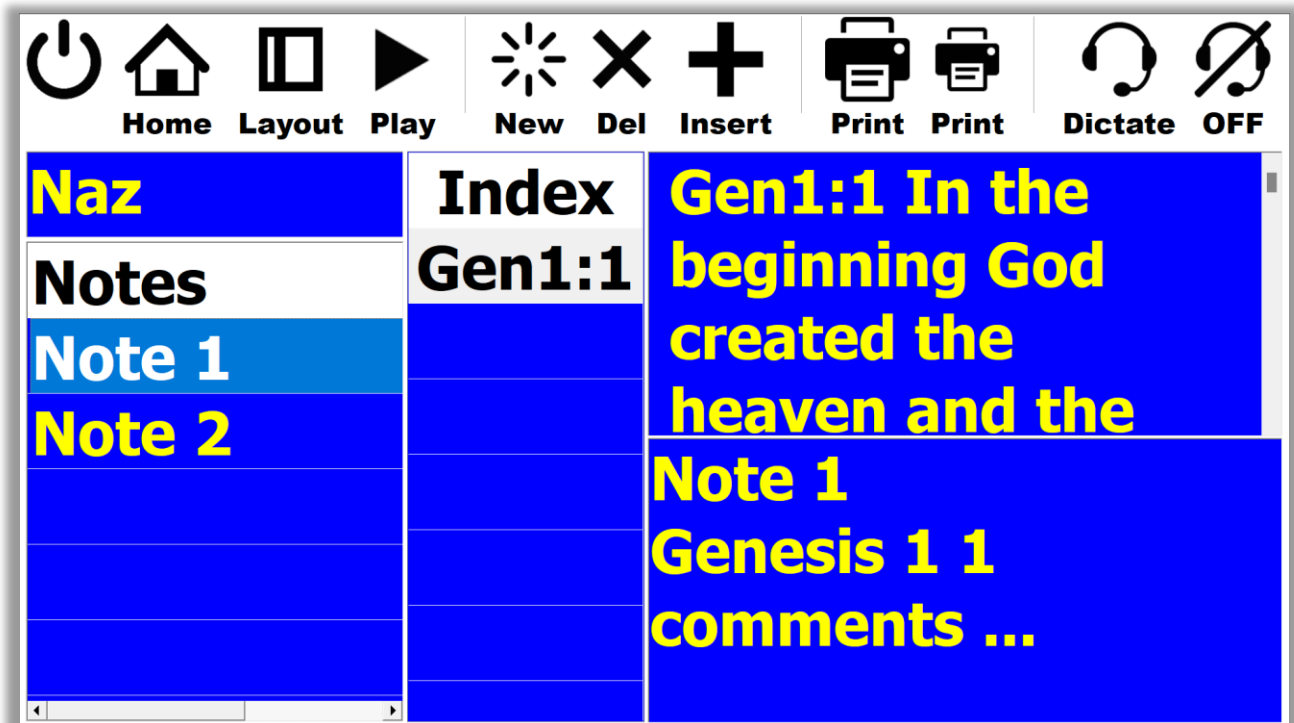

With the Concordance displayed, the search term textbox remains visible. With focus on the textbox, pressing ENTER will scroll to the first word in the Concordance that starts with the same letters as the search term.

If the user selects a word from the Concordance word list, thus giving that list keyboard focus, the user can then type a letter, and the word list will scroll to the first word in the list that starts with that letter.

## User Notes:

As part of studying the Bible, users may want to take notes – their thoughts about the scriptures that they are reading. **EZBible** supports taking multiple Notes, the title and content of which are entered by the user.

The first line of a Note is used as the Note title. The title is updated when the Note is left, or the user clicks on the title in the list. Whatever a user types into the Note textbox is automatically saved when another Note is displayed or when the user leaves the Notes dialog. The Index lists all verses referenced in a Note. Clicking on an Index list item scrolls the Bible to that verse. The toolbar Note commands are:

- **New** - create a new Note
- **Delete** - delete the current Note
- **Insert** - insert, into the Note, the verse title found at the caret in the Bible
- **Print** - print the current note (large font)
- **Print** - print the current Note (small font)

- **Dictate** - begins dictation
- **OFF** - stops dictation

To start dictation, press the “Dictate” button. Once clicked, the user must wait for Windows to present a blue “listening” button. The user may have to press the microphone icon to start “listening”.

At that point what the user speaks will be typed into the Note or Search Term text boxes at the caret. The OFF button must be clicked to stop dictation.

The Search Term box is kept visible in Notes to allow the user to search for the next occurrence of the search term in the bible. Select the Search Term box and press enter to scroll the bible to the next occurrence of the search term.

## Tutorials:

The Tutorials section provides users with information about the Bible that can help new readers to the Bible. A description of each Bible book, a Top 100 verses list, a 365-day Bible study plan are available. A library of music is also available and be listened to while working in Bible.

## Book Summaries:

The Book Summary provides a list of all books in the Bible, along with a brief description of what is found in each of the Books.

The screenshot shows a user interface for a Bible application. At the top, there is a navigation bar with icons and labels: a power button, a home icon, a play button, a book icon, a list icon, a calendar icon with the number 1, a musical note icon, and two printer icons. Below the navigation bar is a list of books: Books, Genesis, Exodus, Leviticus, Numbers, Deuteronomy, Joshua, and Judges. The 'Genesis' book is selected, and its summary is displayed in a large blue box with yellow text. The summary for Genesis reads: "Describes the creation; gives the history of the old world, and of the steps taken by God toward the formation of theocracy." Below this, the start of the summary for Exodus is visible: "Exodus The history of Israel's".

## Top 100 Verses:

While all Bible verses are important, a list of the 100 most-read verses of the Bible can be useful to help readers prioritize which verses they might want to read or refer to frequently.

The screenshot shows the EZBible application interface. At the top, there is a navigation bar with icons for Home, Play, Books, Top100, Plan, Songs, and two Print options. Below the navigation bar, the 'Top 100' list is displayed on the left, and the text of the selected verse is shown on the right. The list is as follows:

Rank	Verse
1	Joh3:16
2	Jer29:11
3	Rom8:28
4	Psa23:4
5	Psa23:6
6	Psa23:5
7	Mat6:33

The text of the top two verses is displayed on the right:

**1 Joh3:16 For God so loved the world, that he gave his only begotten Son, that whosoever believeth in him should not perish, but have everlasting life.**

**2 Jer29:11 For I know the thoughts that I think**

All 100 of the verses are extracted from the Bible and displayed for the user to more easily scroll.

When the Top100 List is opened, **EZBible** will scroll to the last verse that was selected in the list.

## 365 Day Study Plan:

For a full understanding of the Bible, it is important to read the entire Bible. But where to start? This 365 Day Study Plan gives you a recommendation of passages to read each day, with the goal of reading the entire Bible in one year.

**Importantly**, this feature also extracts the suggested passages, putting the entire lesson on the screen without having to scroll through the entire Bible.

The screenshot displays the EZBible 365 Day Study Plan interface. At the top, there is a navigation bar with icons for Home, Play, Books, Top100, Plan, Song, and two Print options. Below the navigation bar, there is a list of days on the left and the text for Day 1 on the right.

Days	Day 1 Passages:
1	Psa148; Gen1-2; Eph1
2	
3	Psa148:1 Praise ye the LORD.
4	Praise ye the LORD from the
5	heavens: praise him in the
6	heights.

When the Study Plan is opened, **EZBible** will scroll to the last day that was viewed.

## Songs:

The saying that “music is good for the soul” makes it entirely appropriate to include hymns in **EZBible!** The Song tutorial mode provides a list of the popular hymns which users can play for spiritual and emotional well-being.

Just select a song and press Play on the toolbar to hear the song. The song will play until you stop it or when you exit **EZBible**.

Users may add songs to the list, either MP3 or MID formats, by placing them in the c:\EZReader\songs\religion folder. EZBible currently has no automatic method of importing songs, such as from a flash drive.

## Settings:

In Settings, a user can select the Bible to be displayed and select the format used to display verse titles. Clicking on a Bible name from the list will speak the name of the Bible and switch the display to the selected Bible. The toolbar will be updated to reflect the name of the new Bible.

Home Play KJV Title

**Bibles**

- KJV : King James V
- NKJV : New King Ja
- NET : New English
- NIV : New Internat
- NLT : New Living T
- ESV : English Stand

**Gen1:1 In the beginning God created the heaven and the earth.**

**Gen1:2 And the earth was without**

A user can select which Bibles will be available for display and for verse comparison. Open the Search windows, select Matches, enter “:” in the Search Term textbox and press Enter to see a list of Bibles in use. To change which Bibles are available for display, enter “:” followed by the letter abbreviations for each Bible that is to be used and then press Enter. For example, “: KJV NKVJ” would allow only those two Bibles to appear in the Bible list and to be used in verse comparisons. Enter “:all” to restore the Bible list to all available Bibles.

## Verse Comparison Between Bibles:

From the **EZBible** main screen, The COMP command will display the content of the current verse from all Bibles, allowing a user to compare verse differences between Bibles. If the comparison is shown, press Home or COMP to exit from the COMP

Moving the mouse over the COMP icon will display the name of the verse to be compared.

The screenshot shows the EZBible interface with a navigation bar at the top containing icons for Home, Width, Play, Search, Notes, Tutorials, Settings, and COMP. The COMP icon is highlighted, and the screen displays the following text:

**::::: King James Version :::::**  
**Gen 1:1 In the beginning God created the heaven and the earth.**

**::::: New King James Version :::::**  
**Gen 1:1 In the beginning God created the heavens and the earth.**

## Keyboard Shortcuts :

Keyboard shortcuts are available for all Toolbar commands as well as for some commands which are not on the Toolbar because the commands are used less frequently.

Some users prefer to use keyboard shortcuts to minimize hand and arm movement. Particularly for users with good typing skills, keyboard shortcuts are a faster approach for issuing commands to the Bible app.

There are approximately 100 different keyboard shortcuts, all of which are available for viewing by right-clicking the Exit icon in the Bible App. Below is a one-page list of all keyboard shortcuts supported by **EZBible**. The one-page list gives very brief descriptions of each shortcut. Following this one-page list are more details about each shortcut.

**Note:** If you right-click on the toolbar Exit button, you'll also see a history of shortcuts you have pressed, followed by a complete list of EZBible shortcuts.

**Note:** In the list, CS means Control+Shift and CA means Control+Alt.

## Speech and Sound:

EZBible supports a wide variety of speech and sound features to allow low vision and blind users to know what keys they have pressed, to know where they are in the program and to control how much or how little verbal responses EZBible provides. Speech options are mostly controlled by keyboard shortcuts to minimize the use of Toolbar buttons.

When a shortcut pressed, the user can optionally be notified of the results – either by a popup text or a spoken message.

Shortcuts discussed here are a subset of the full list of shortcuts discussed in the next section.

### Speech and Sound Actions

- **F9** Speak selected text
- **F12** Speak cursor location
- **CS-L** Speak text from line containing the cursor
  
- **C-B** Speaks word to left of cursor
- **C-W** Speaks word at cursor
- **C-N** Speaks word to right of cursor
  
- **C-S** Start speaking at cursor. Continue until stopped. Also Stops
- **C-H** Stop Speaking
- **C-D** Increase volume
- **C-E** Decrease volume
- **C-Q** Mute speakers
  
- **CS-7** Speak EZBible Version

## Speech and Sound Settings:

This list shows the speech settings, where the underlined setting value is the default.

- F5 Set hover response – sound, text, both, none
- F6 Set RClick toolbar button response – text, sound, both
  
- F7 Toggle speaking keyboard shortcuts – none, app, toolbar, both
- F8 Toggle speaking keys when speaking shortcuts – On/Off
- CA-S Toggle minimal keys when speaking shortcuts – On/Off
  
- F11 Toggle special key response (Editor and Lists) – On/Off  
... LButtonUp, Arrows, PgUp, PgDn, Caps,  
...Enter, Hme, End, Ctl-Hme, Ctl-End
- CA-9 Set response when typing – none, speak letters, words, both
  
- C-R Toggle speaking speed – slow, normal, fast
- C-G Male voice – On/Off
  
- F4 Speak App open/close statements – None, Open, Close, Both
- F10 Determine announcement actions – None, Text, Speech, Both
- CA-A Speak control name when it gets keyboard focus – On/Off
- CA-M Toggle speaking menu row number – On/Off

**Note:** If you right-click on the toolbar Exit button, you'll see a history of shortcuts you have recently pressed, followed by a complete list of EZBible shortcuts.

## Keyboard Shortcuts (Full Descriptions):

Here's a more detailed description of all shortcuts:

- C-A** Select Note text (not allowed in Bible text)
- C-B** Speak the word at the cursor, or the word to the left if on a space
- C-C** Copy selected text to the clipboard
- C-D** Increase sound volume
- C-E** Decrease sound volume
- C-F** Cycle through the 3 fonts (Tahoma, Courier New, MS Comic Sans)
- C-G** Toggle voice between male and female
- C-H** Stop speaking, leaving cursor at last spoken location
- C-I** Speak information about screen content
- C-J** Print (large) selected Bible text. If none, print verse at cursor
- C-K** Print (small) selected Bible text. If none, print verse at cursor
- C-L** Increase font size
- C-M** Decrease font size
- C-N** Speak the next word from the cursor
- C-O** Open On-Screen Keyboard (OSK) for entry of text (Notes only)
- C-P** Reserved
- C-Q** Toggle speakers ON/OFF (Mute/UnMute)
- C-R** Speech speed (slow, normal, fast)
- C-S** Toggle (Start/Stop) speaking at cursor
- C-T** Cycle Bible display between 3 verse formats: Compact, Full, Short

- CA-B** Toggle font bold attribute

**CA-C** Display Tutorial/Book Summary  
**CA-D** Display Tutorial/Top 100  
**CA-E** Toggle Beep sound  
**CA-F** Display Tutorial/Study Plan  
**CA-G** Determine if ESC or RClick allowed to close EZBible  
**CA-H** Display Main Screen (Home)  
**CA-I** Display Search/Bookmarks  
**CA-J** Add Bookmark - the verse containing the cursor  
**CA-K** Remove Bookmark - the verse containing the cursor  
**CA-L** Load Songs Library  
**CA-M** Toggle announcing Menu  
**CA-N** Cycle to next Menu  
**CA-O** Create a New Note. Must be in Notes mode  
**CA-P** Delete the current Note. Must be in Notes mode  
**CA-Q** Add reference to Bible verse at cursor. Must be in Notes mode  
**CA-R** Not available in Search or Tutorials modes ...  
    ... in Notes: toggle options to show various display fields  
    ... in Home/Settings: toggle showing Bible full screen width  
**CA-S** Toggle speak minimal key description when speaking shortcuts  
**CA-T** Reserved  
**CA-U** Speak Bible selection. If none, Bible verse at cursor  
**CA-V** Toggle between whole word and string searches  
**CA-W** Toggle between Bible display margins  
**CA-X** Turns Dictation OFF  
**CA-Y** Copy selected Bible text. If none, verse at cursor is copied  
**CA-Z** Scroll Bible so that the line containing the caret is visible

**CS-A** Reserved

**CS-B** Toggle printer orientation between landscape and portrait

**CS-C** Toggle display of Bible content in all caps

**CS-D** Toggle display of Bible content in shade mode

**CS-E** Toggle displaying ONLY the line with the cursor (full shade)

**CS-F** Toggle display of Bible content in small font

**CS-G** Print Text in Color (Background is white)

**CS-H** Toggle header on all columns (to provide more room for list content)

**CS-I** Toggle time that a popup text message will stay on the screen

**CS-J** Toggle no spacing, word spacing and letter spacing of Bible content

**CS-K** Search up the Bible for the next line containing the Search Term

**CS-L** Speak the Bible line containing the cursor and the line position

**CS-M** Copy the EZBible toolbar

**CS-N** Print List Large (Matches, Flags, ConVerses, Top100 only, Bible List)

**CS-O** Sort Bible books alphabetically

**CS-P** Print an image of the entire EZBible window (uses color)

**CS-Q** Reset text formatting options (row 5 option)

**CS-R** Allow use of Control+A to select all text

**CS-S** Reserved

**CS-T** Opens TeamViewer utility to allow remote user support

**CS-U** Underline only the Bible text line that contains the cursor

**CS-V** Toggle line-to-line spacing (none, +1, +2)

**CS-W** Update SearchTerm with selected Bible text, then open Search mode

**CS-X** Begin dictation (wait for blue microphone to beep)

**CS-Y** Search down the Bible for the next line containing the Search Term

**CS-Z** Display Concordance

**CS-5** Speak list items when selected  
**CS-6** Update EZBible  
**CS-7** Speak EZBible Version  
**CS-8** Print Current Tutorial content (Small Font)

**CA-1** Open Search mode  
**CA-2** Open Notes mode  
**CA-3** Open Tutorials mode  
**CA-4** Open Settings mode  
**CA-5** Open Compare Mode  
**CA-6** Print Note (Large)  
**CA-7** Print Note (Small)  
**CA-8** Print Tutorial (Large)  
**CA-9** Response when typing - letter, words, both

**ESC** Exit EZBible

**F1** Online Help  
**F4** Speak App open/close statements  
**F5** Sets text, voice or none when a mouse hovers over a Toolbar key  
**F6** Sets text, voice or none when a Toolbar key is right-mouse clicked  
**F7** Determines if keyboard shortcuts are spoken when pressed  
**F8** Determines if keyboard shortcuts include the shortcut key  
**F9** Speak selected text from the Bible content  
**F10** Determines if text popup, sound or none is used in Announcements  
**F11** Determines spoken response to pressing special keys  
**F12** Speak location of cursor

## Blind Users:

In addition to the shortcuts described in the earlier section “Speech and Sound”, EZBible has other options to provide blind users with speech that facilitates navigation and operation within EZBible.

### Location Shortcut – Ctrl+I

The keyboard shortcut Ctrl+I is the primary method for blind users to hear where they are in EZReader. When pressed, it provides the following information:

- Mode
- Field
- Current Selection

Mode is spoken as Main Screen, Search Mode, Notes Mode, Tutorials Mode, Settings Mode or Comparison Mode.

The name spoken for a field depends on the current mode. For lists, the content type in the list is spoken – such as Books List, Chapters List. For textboxes, the field is given as Search Term, Notes Text or Bible Text.

The current selection is given as the text in the selected line of a List or the line of text containing the cursor in a textbox.

### Navigation Shortcut – TAB

The TAB key is used to move focus from one field to another, typically left-to-right. The SHIFT+TAB shortcut moves focus in the opposite direction.

When a new field gets focus, EZBible can speak the field and its current selection. The keyboard shortcut Ctrl+Alt+A toggles whether controls speak focus when getting control.

## Tips:

Here are some additional comments on using EZBible that didn't seem to fit into the earlier sections.

1. The font size can be changed by pressing the Ctrl key and spinning the mouse. This is a very fast way to change font size.

2. When a column header is clicked, the selected item scrolls into view.

**3. Windows Narrator may be used with EZBible. When it is on, these shortcut keys apply:**

- a. Ctrl+Win+Enter    On/Off
- b. Ctrl+T            Move Focus to Windows TaskBar
- c. Ctrl+B            Move Focus to Windows System Tray
- d. TAB              Desktop > Start > Search > TaskBar > SysTray
- e. Ctrl               Stop Speaking

**4. Useful Window manipulations**

- a. Win+D            Show/Hide Desk. RClick START. Low Right.
- b. Win+Up          Maximize window
- c. Win+Down       Normalize window
- d. Win+M           Minimize All Windows
- e. Win+Shift+M    Restore all minimized Windows

**5. Windows Magnifier Shortcuts**

- a. Win+Plus        Activate magnifier. When activated, more zoom
- b. Win+Minus      With magnifier activated, zoom out
- c. Win+ESC        Turn OFF magnifier
- d. Ctl+Alt+Wheel   Zoom in or out
- e. Ctl+Alt-I        Invert colors
- f. Ctl+Alt+L       Switch to lens
- g. Ctl+Alt+F       Switch to full screen view

- h. Ctl+Alt+M            Toggle views
- i. Win+Ctl+ENTER    Speak/read screen

## Resources:

Here are some additional Bible study resources:

1. [StudyLight.org](http://StudyLight.org)            Read, Study and Search God's Word
2. [Bible Hub](http://Bible Hub)                    Online Bible Study Suite

Feel free to recommend Bible study sites you have found to be helpful!

## Change History:

I won't keep all changes here, just the more recent ones.

1. Last BCV selected on main screen is kept between sessions and when pressing "Home" from lower-level features.
2. When a verse list is displayed, scroll the Bible to the first verse in the list
3. HOME key opens command Row 1 and highlights the last selected BCV
4. Remote control utility TeamViewer added to the distribution
5. Added BookMark icon to command Row 2 - easier to flag a verse

**Suggestions and comments are welcome!**
