

EZReader Folders Application

Folder displays a tree of all folders in the selected drive and displays the files in those folders.

Files may be copied to any EZReader folder. Files may also be renamed and deleted.

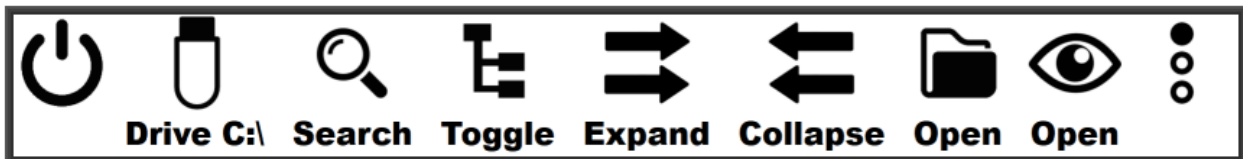

Individual folders can be expanded or closed by pressing the symbol in front of a folder's name. A selected folder can also be opened in Windows Explorer (external to EZReader).

A list of the files found in a folder is shown. Double-clicking on a file will open the file, using EZReader's internal file viewers or using external file viewers, depending on the setting chosen by the user.
