

## EZReader OSK Application

The OSK provides a more visible way for a user to enter text into a text field. The OSK is available in all EZReader applications which allow text entry.

EZOSK can display one of 3 sets of characters. Press a character to add it to the textbox at the cursor.

Once all text is entered, press the Copy button to place the text on the clipboard, ready for pasting into other Windows applications.

### Toolbar Commands:

OSK has a single row of command icons:

**Clear:** Clears the OSK text field

**Save:** Places the entered text into the text edit field which was active when the OSK dialog was opened.
