

EZReader TaskBar Icon Selector Application

TaskBar Icon Selector lets a user chose which icons will be displayed on the EZReader EZTaskBar.

The Selection application provide a very easy way for users to assign which icons are displayed on the EZTaskBar. From its image of all available applications, the user selects application to be shown on EZTaskBar and unselects those that will not be shown on the EZTaskBar.

Right-mouse click the EZTaskBar or EZCenterBar Exit buttons to display the Selection dialog.

With the Selection dialog displayed, clicking an application icon toggles its selection.

Pressing the Save icon saves the selections and closes the App Selector window

Reset - sets selections to EZReader suggested defaults

Colors - changes the color used for selecting an application

Selection Colors – set the colors used to mark icons for display on the EZTaskBar

There are a number of empty cells in the Selection screen. These represent spaces which can be displayed on EZTaskBar to provide visual gaps between icons.
