

ZReader SIMPLE Interface

The SIMPLE interface provides an alternate way to access EZReader applications.

The default interface is the EZTaskBar, where the user can place icons to open their favorite, or most-used, applications.

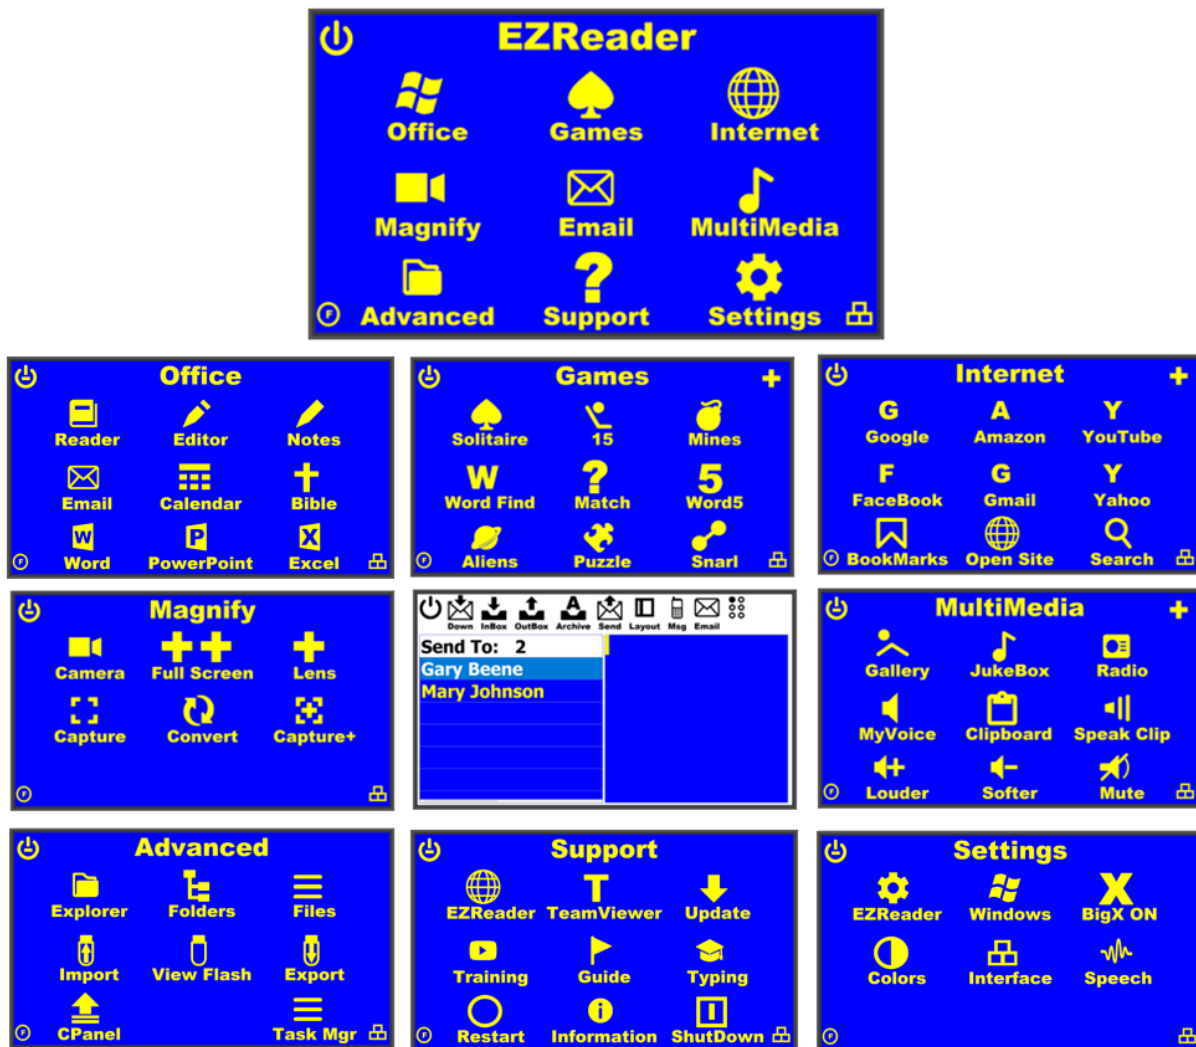

This SIMPLE interface is also available, which displays large icons which will open applications from the specified category.

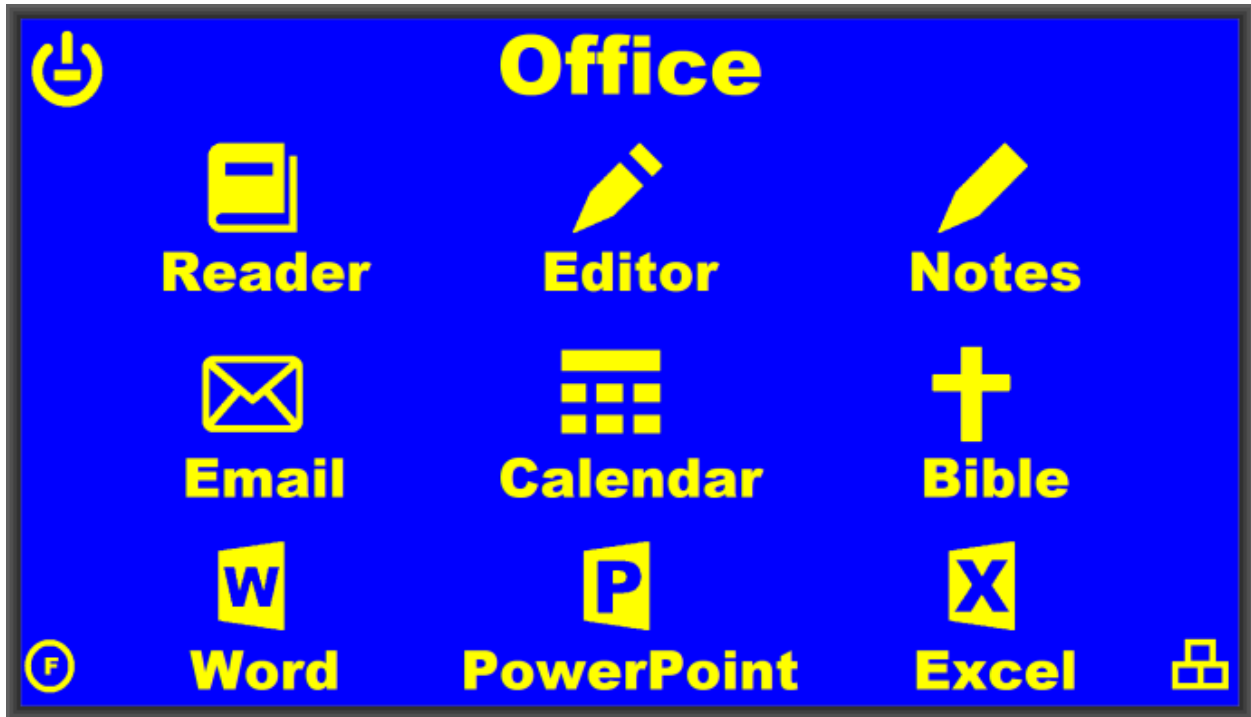

The icons for each of the categories are shown below, starting with a composite of the icons in all 9 categories.

Note that the applications opened by each icon is exactly the same application that opens from the default interface. SIMPLE is just a different method of getting to the applications.

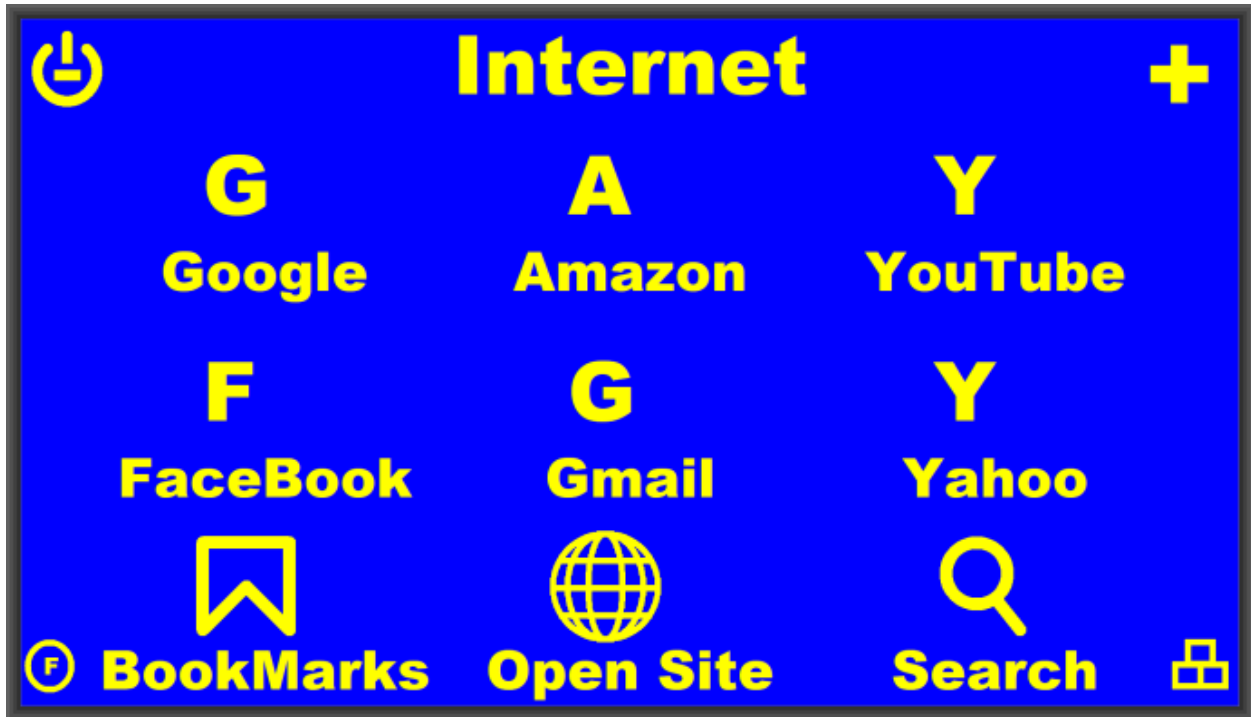

Office Category Icons:

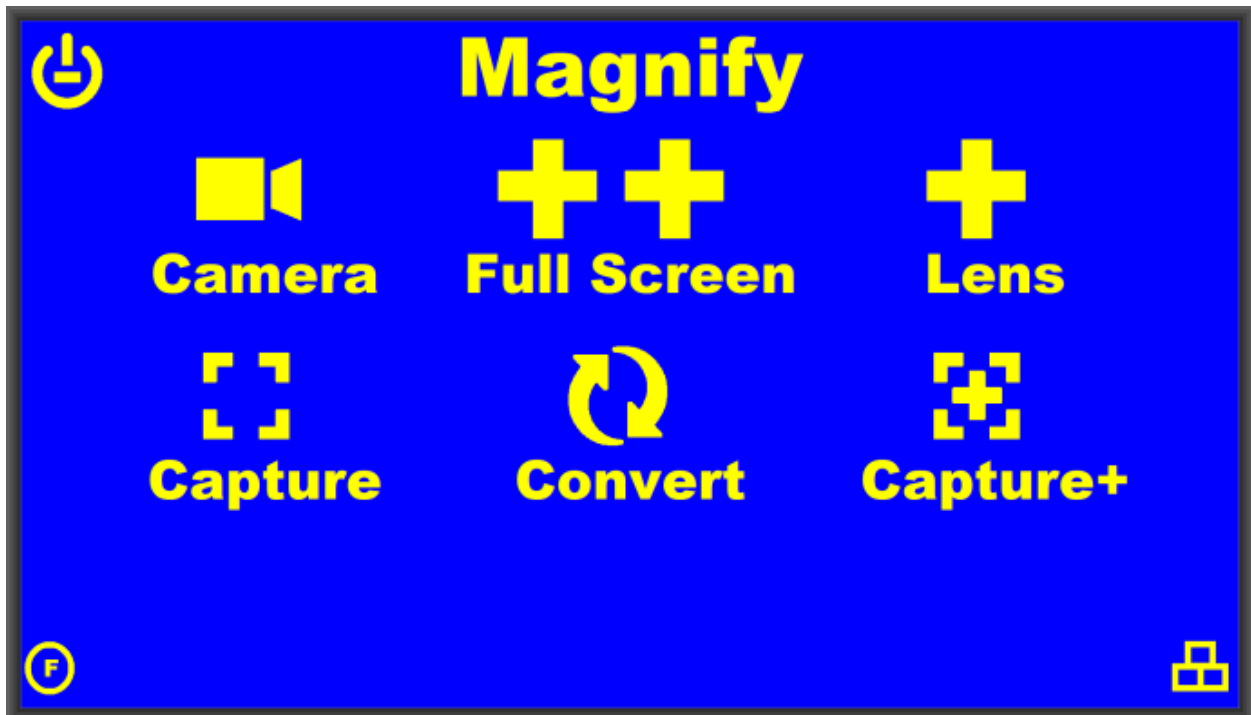

Games Category Icons:

Internet Category Icons:

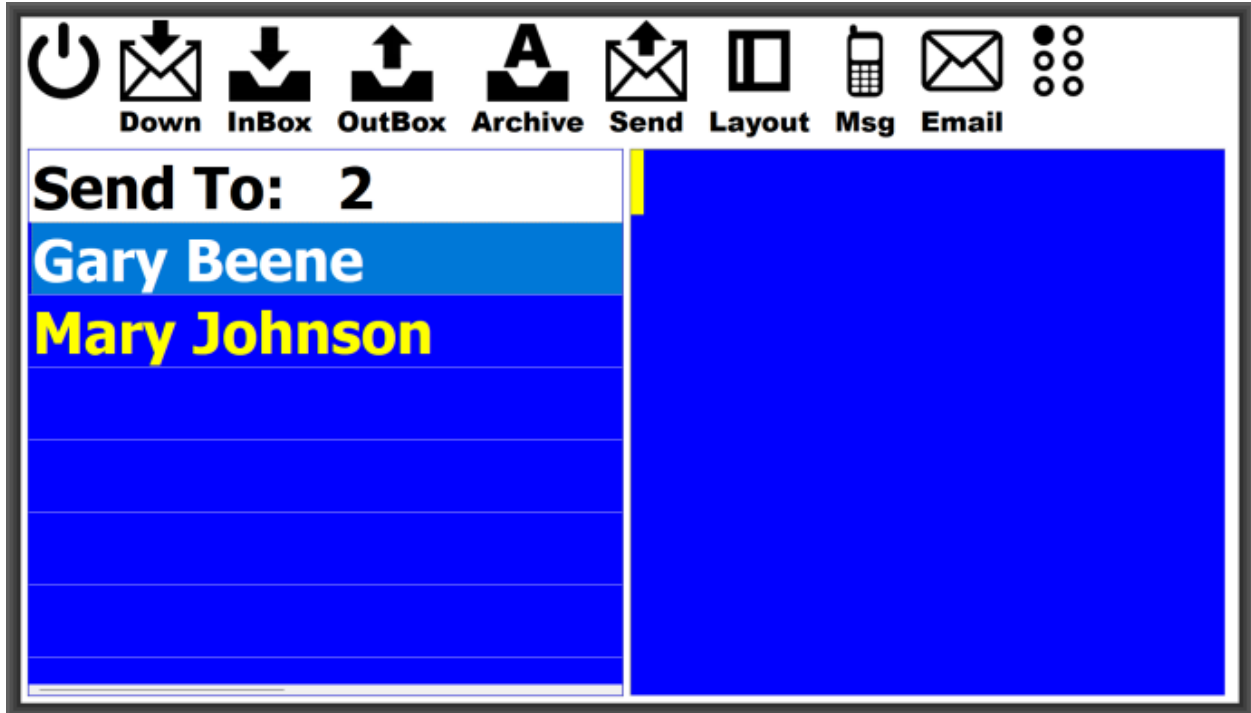

Magnify Category Icons:

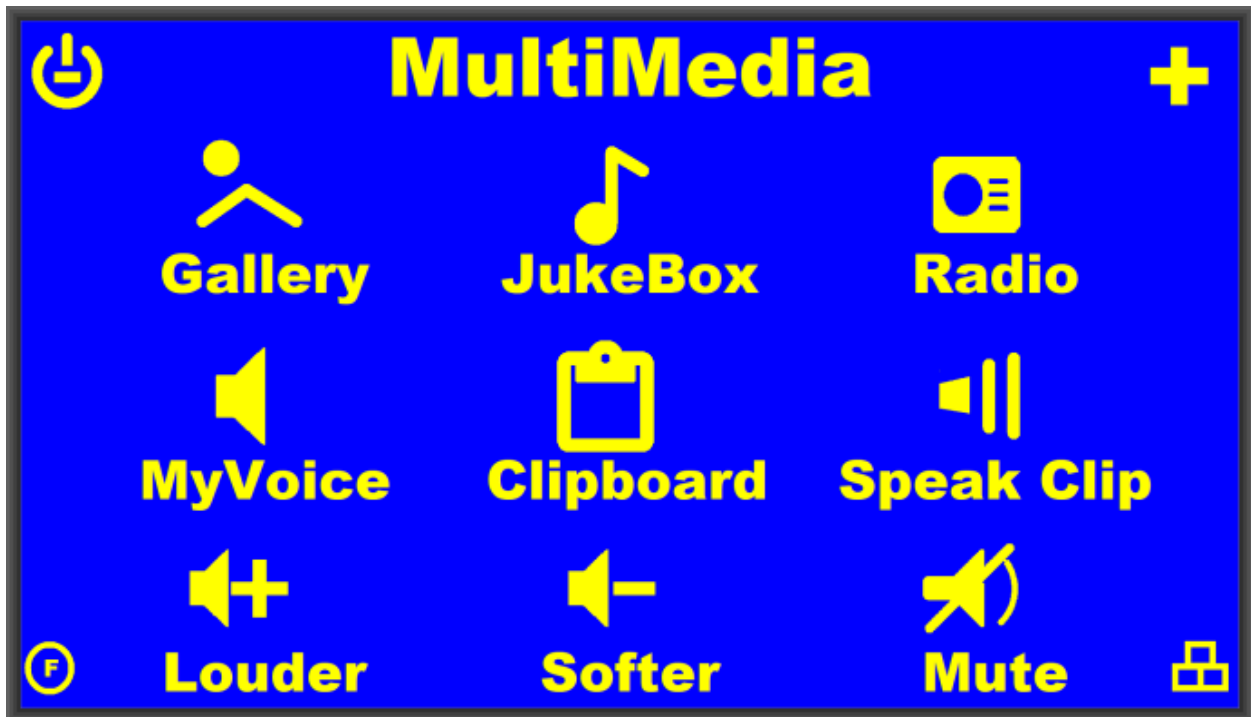

Email Category Icons:

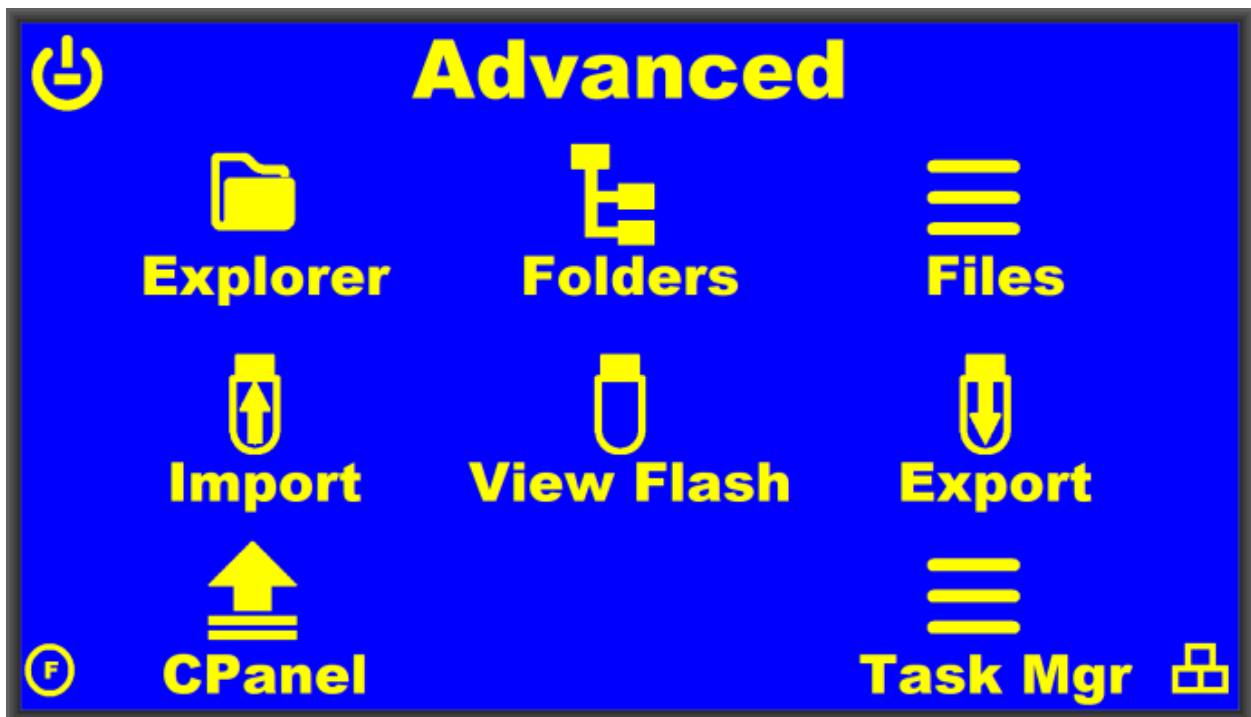

As a part of recent changes, applications once found in the Email Category have been merged into a single Email application which open when clicking on the Email category.

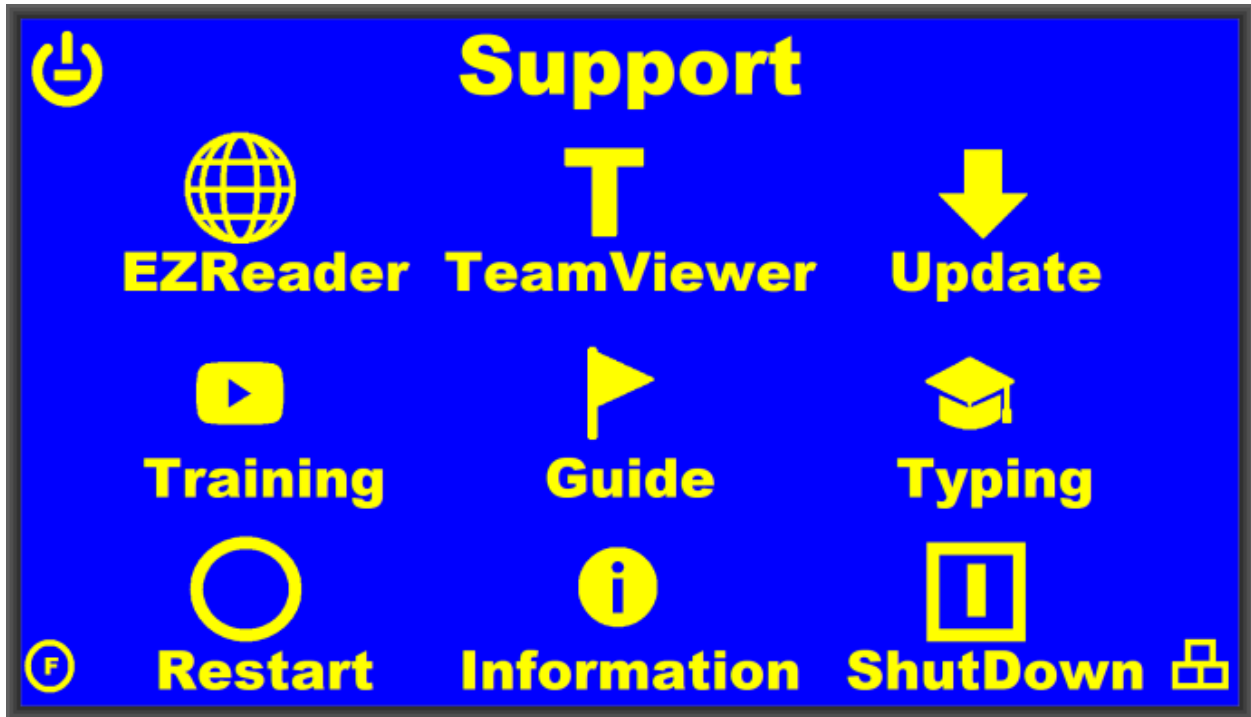

MultiMedia Category Icons:

Advanced User Category Icons:
