

EZReader Timer Application

The Timer application sounds an alarm after a user-specified number of minutes.

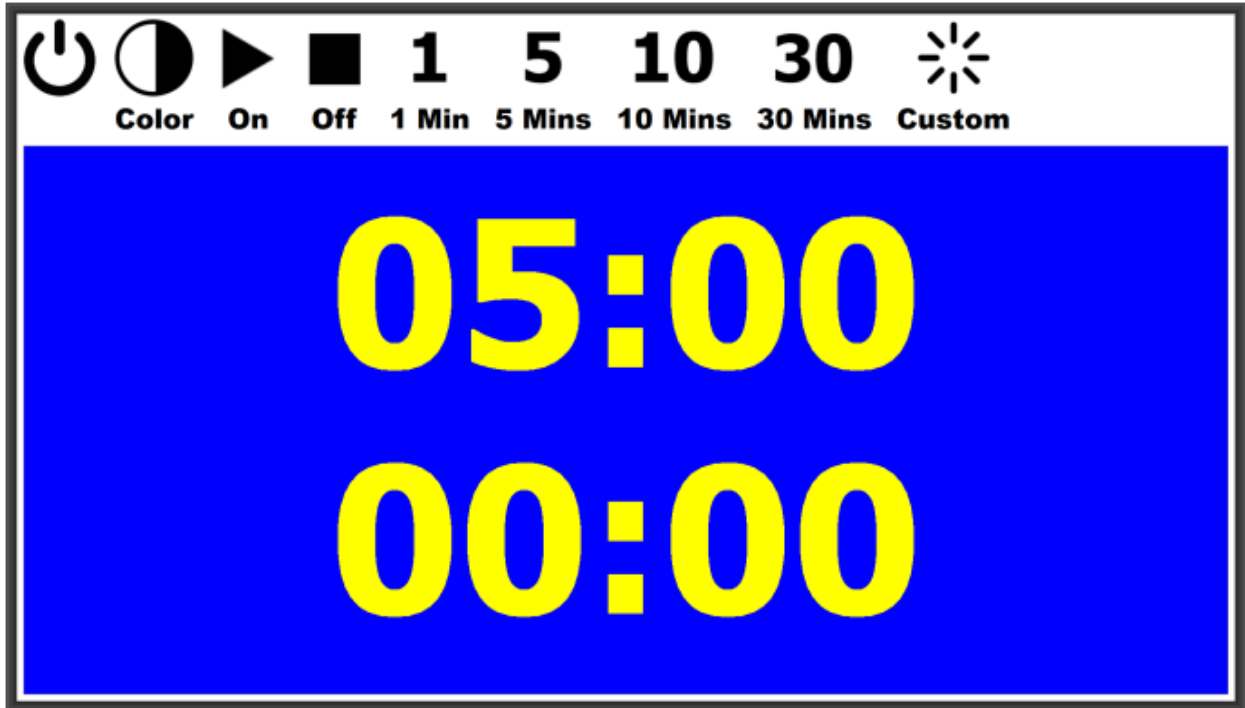

The countdown Timer sets off an alarm following a user-specified interval of 1, 5, 10 and 30 minutes. A custom timer interval of minutes can also be set.

The Timer application displays both a countdown value and an elapsed time.

Once the alarm goes off, it continues until shut off by the user.

The Timer application must be visible for the Timer to work correctly. If the Timer application is closed, the timer is disabled.

The Timer information is displayed at the largest possible font size. The Timer font size cannot be set by the user.

Toolbar Commands:

The Timer app has a single row of command icons:

Color: Cycle through available color pairs

On: Turn the Timer ON

Off: Turn the Timer OFF

1: Set Timer for 1 Minute

5: Set Timer for 5 Minutes

10: Set Timer for 10 Minutes
