

## **EZReader Typing Tutor Application**

Typing Tutor teaches the user to type by practicing progressively more difficult text.

Typing Tutor creates Lessons (strings of text) which a user must type. The user typing speed and accuracy is measured for each Lesson.

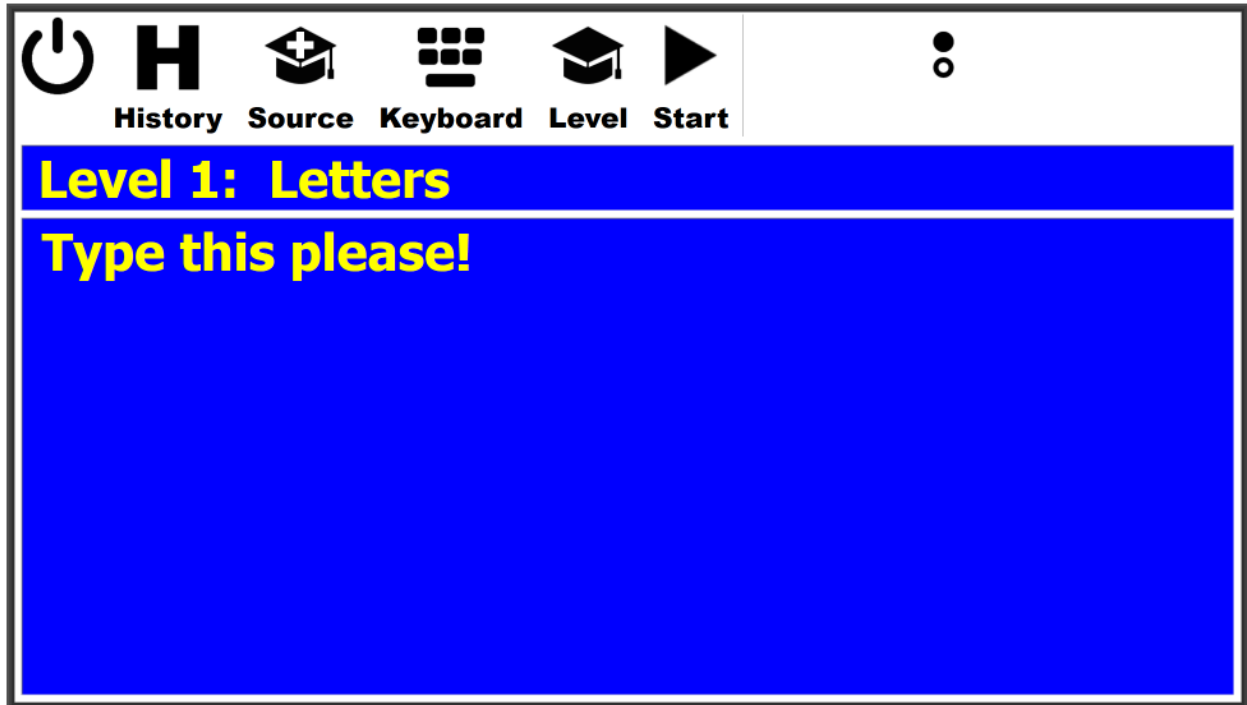

There is no time limit. A user can work on a Lesson as long as they wish. When they press Stop the Lesson will end, Speed and Accuracy calculated, and all result will be maintained in a History file.

History of speed and accuracy are viewed as graphs, but the entire lesson history (lesson strings, user inputs and performance results) may be viewed in text form as well.

There are 4 levels of Lessons - letters, words, phrases and Chuck Norris!

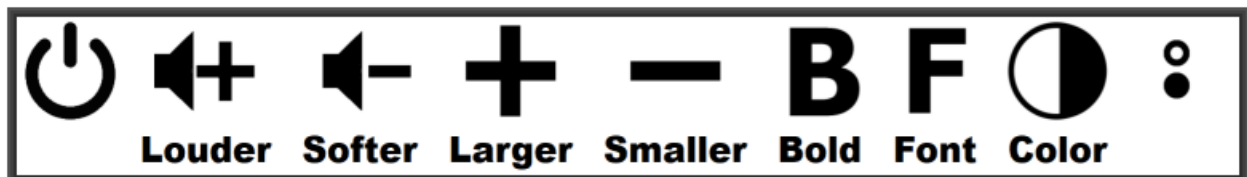

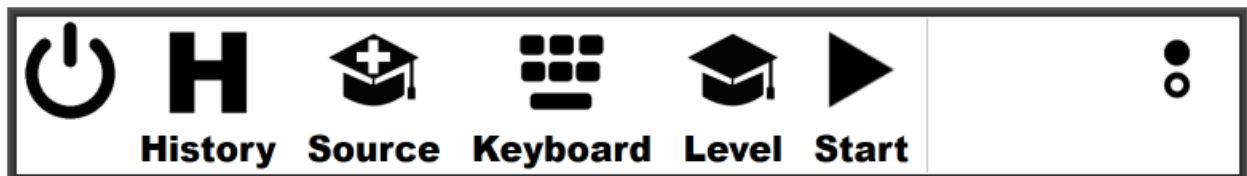

<b>Level</b>	<b>Example</b>
<b>Letters</b>	r t
<b>Words</b>	child
<b>Phrase</b>	How does it taste?

Chuck Norris Chuck Norris an unscramble eggs!

**Toolbar Commands:**

Typing Tutor has 2 primary rows of command icons:

Typing Tutor displays this row of command icons during a lesson.
