

EZReader User Colors Application

The User Colors app allows the user to select the 4rd color pair that is displayed when the Change Color command is given in any EZReader application.

The words "User Colors" are displayed at the top of the page using the currently selected user-defined color pair. It updates colors as the user selects makes changes.

Toolbar Commands:

User Colors has a single row of command icons:

Save: Save the selected colors as the 4rd color pair
