

EZReader Weather Application

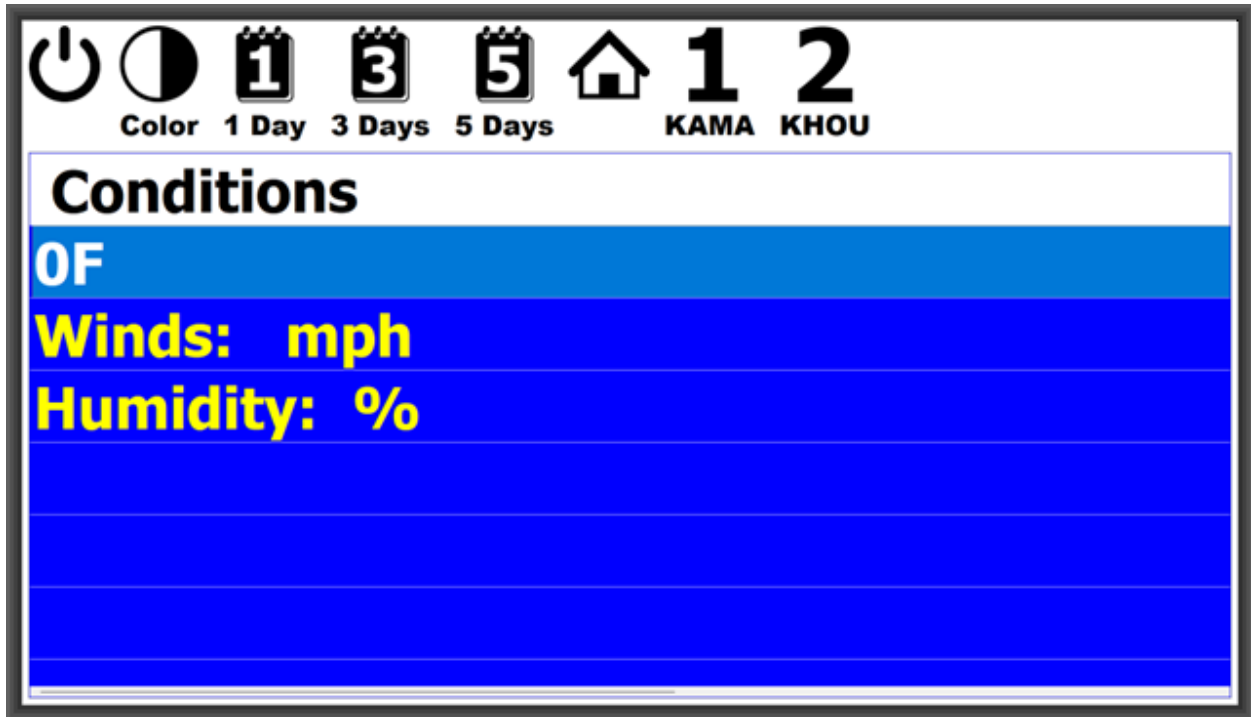

The Weather App provides weather for 3 locations, including current for forecasted weather conditions.

The Weather application provides current weather, plus 3-day and 5-day weather forecasts. Reports are available for the user's location and two secondary locations.

Pressing the icons labeled 1-3-5 return current weather or 3/5 day forecasts.

Pressing the Home, "1" and "2" icons returns local or secondary city weather - current or forecast, whichever was most recently selected.

The user home and secondary locations are set by using the EZReader File Editor to edit the "cities" System file.

Toolbar Commands:

The Weather app has a single row of command icons:
