

EZReader Word Find Application

Word Find lets the user locate words, made from adjacent letters in a random grid of letters.

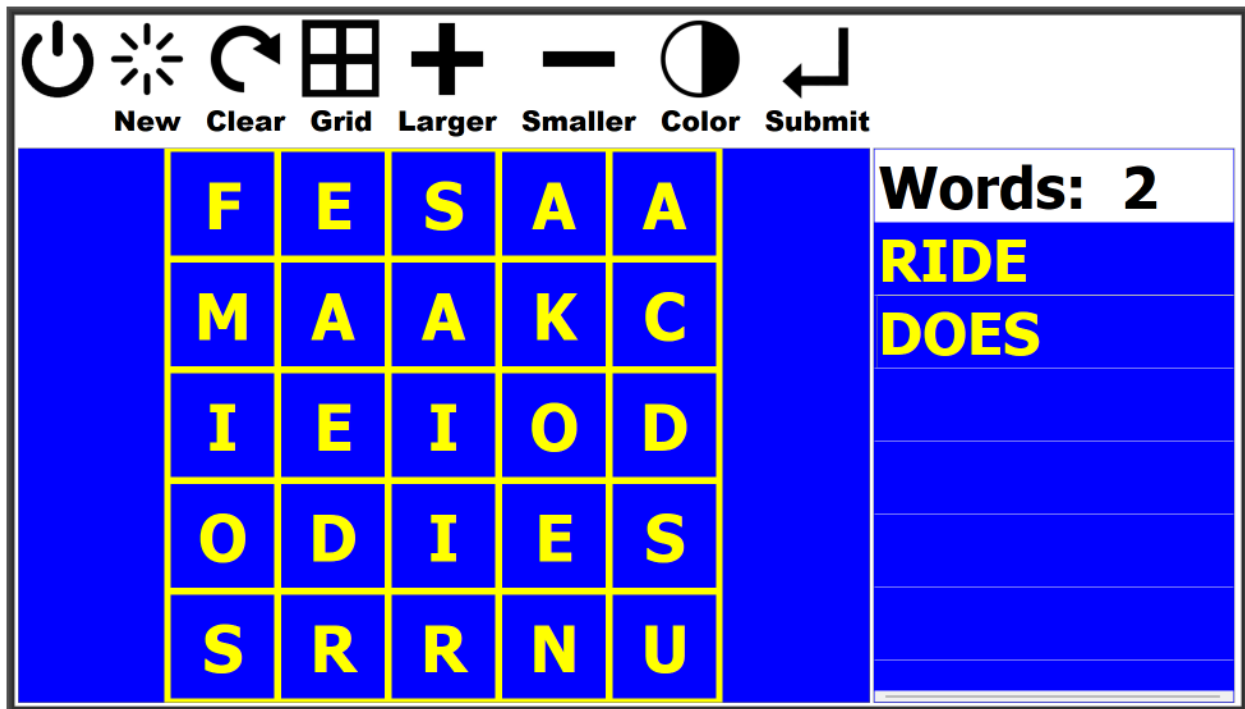

The EZReader Word Find game consists of a 5x5 tile playing area. Each tile is randomly filled with a letter. The number of tiles can be set by the user.

The object of the game is to create as many words as possible using adjacent letters. Words must contain at least 2 letters and no word may be used twice.

To play, click on a sequential string of letters to form a word, then submit the word. Submitted words are compared to the EZReader dictionary. Valid words score 1 point.

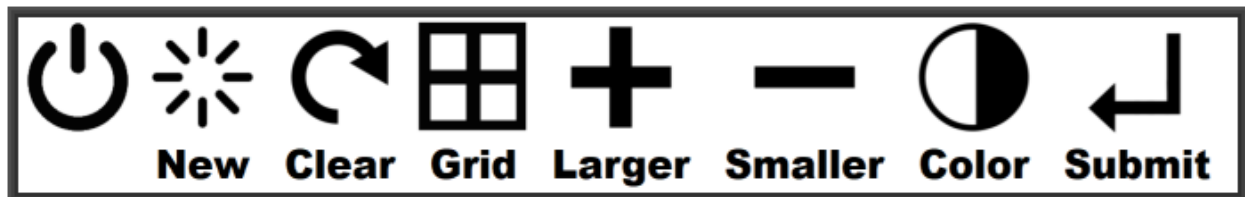

Letters are highlighted as they are clicked. Submitting a word or pressing the reset icon will unhighlight all letters.

There is no time limit on finding words. Play with it until you cannot find any further words.

Toolbar Commands:

Word Find has a single row of command icons:

- **New** - new game
- **Clear:** - de-select all letters
- **Grid** - select size of grid
- **Larger** - increase font size
