## Easy Independence with EZReader

**Can you complete tasks on your own?**

**Do you have to wait for help from someone else?**

**Do you feel like a burden on friends and family?**

The harsh reality of low vision is that your independence is threatened. I have heard this frustration from every one of my EZReader users and every user has told me how EZReader increases their feeling of independence!

Here are a few of the tasks EZReader users perform on their own:

- Communicate via email and text messaging
- Read Kindle books and magazines
- Pay bills online
- Write a book or keep a journal
- Perform online searches
- Open and close bookmarked websites

**If it needs to be done on a computer, EZReader can help you do it on your own!**

For more information about the EZReader System, please visit our website at [www.newvisionconcepts.com](http://www.newvisionconcepts.com), call 214.668.9913 or email [gbeene@airmail.net](mailto:gbeene@airmail.net).

### What People Are Saying About EZReader and Gary Beene:

"Gary Beene has opened new aspects of our world of increased independence for me. His software and hardware skills have enabled me to have grocery delivery and continue my Air BNB business ... and SMILE ... a lot of my family and friends also smile at my increased happiness and independence. Also, I am proud to be a member of Gary's group that he calls "My People" ... which provides me easy in-person access to Gary's problem-solving "fixes". How great is that!"

-Donna, Nevada, TX

Gary Beene, Inventor of the EZReader System.
